PROPOSAL

ORGANISATION OVERVIEW:

NAME: Curio Hub

BRIEF HISTORY:

Curio hub is a technology initiative founded in 2023 by Ms Shongile Makhubele and Praise Mdaka. The organisation was created because of the lack of digital literacy and technology opportunities in the communities. It began as a small business that focuses on helping individuals understand basic digital tools and developed into a hub that encourages innovation and technology learning.

SA e-commerce hits R55bn in 2023 (Worldwide Worx 2024) and Curio Hub aims to empower individuals by providing digital knowledge, mentorship and resources. It supports people who want to explore the tech opportunities in tech industry and helps them transform ideas into practical digital solutions.

MISSION:

The mission that Curio hub has is to empower individuals and communities by providing access to digital education, innovative technology solutions and practical skills that will enable people to participate confidently in the modern digital world.

VISION:

The vision of Curio Hub is to become the leading technology Hub is communities that provides innovation, digital literacy and inclusive access to the tech industry.

TARGET MARKET:

The organisation targets:

- Students
- Young innovators
- Entrepreneurs
- Community members

LSM prefer mobile friendly sites (Statista 2023)

GOALS AND OBJECTIVES:

The goal of this website is to create an online platform that increases engagement with Curio Hub's services. The website will provide information about technology programmes, innovation initiatives and digital learning. Objectives include increasing website traffic, promoting services and allow users to contact organisation. The key performance indicators will include website visits, user engagement and the number of enquiries received.

CURRENT ANALYSIS

Currently Curio Hub does not have a website, this limits its online visibility and makes it hard for potential users to access information about the organisation. 60% of SA SMEs don't have website (SEDE 2023) by developing a website, it will improve communication, accessibility and awareness of the organisation.

FEATURES AND FUNCTIONALITY

The website will include essential pages such as:

- Home page: introducing the organisation, according to (Chaffey 2022) homepages must show value in 3seconds
 - About us: brief explanation about the organisation
 - Services: explain learning opportunities and technology support
 - Pricelist: the prices of the services
 - Contact: allows users to communicate directly with the organisation.
- Word press runs 43% of websites globally (W3Techs 2024)

DESIGN AND USER EXPERIENCE

The website will use recent and simple design that reflects innovation and professionalism. A colour scheme blue and white will represent creativity and technology. Clear typography and easy navigation will ensure good experience.

TECHNICAL REQUIREMENTS

This app will be developed using HTML to have a responsive and interactive design. Suitable hosting service and domain name will be selected to ensure the website is accessible.

TIMELINE AND MILESTONE

The project will follow all stages including research, planning, development and testing. Each stage will be completed according to the project timeline to ensure that it is ready before submission.

BUDGET

- ✓ Domain registration: R150-R300 per year
- ✓ Hosting: +/- R1000 per year
- ✓ Additional fees: updates and maintenance
